

# 泛型 1

## Generic Type Part I

TypeScript

```
class MyClass<D> {  
    public data: D;  
  
    constructor(d: D) {  
        this.data = d;  
    }  
}
```

```
const myClass = new MyClass<string>("MWC 2023!");  
// => const myClass = new MyClass("MWC 2023!");
```

# 泛型 1

## Generic Type Part I

Rust

```
struct MyStruct<D> {  
    pub data: D,  
}  
  
impl<D> MyStruct<D> {  
    pub fn new(data: D) -> Self {  
        Self { data }  
    }  
}  
  
let my_struct = MyStruct::<String>::new("MWC 2023!");  
// => let my_struct = MyStruct::new("MWC 2023!");
```
