物件印不出來怎麼 debug！
Debug 愛配這個

```rust
#[derive(Debug)]
struct Foo {
    name: String,
}

fn main() {
    let foo = Foo { name: "test".to_string() };
    println!("{:?}", foo);
}

Output => { name: "test" }
```

"String" != String
Type &str != String

```
fn show(s: String) {
    println!("{}", s)
}

let my_str = "MWC 2023";

show(my_str);

|       show(my_str);
|       ---- ^^^^^- help: try using a conversion method: `.to_string()`
|       |    |
|       |    expected `String`, found `&str`
|       arguments to this function are incorrect
```
