類別
Class? Struct!

TypeScript

```typescript
class Foo {
  public name: string;

  constructor(name: string) {
    this.name = name;
  }

  getName(): string {
    return this.name;
  }
}

const foo = new Foo("Duye");
```

Class? Struct!

Rust

```rust
struct Foo {
    name: String,
}

impl Foo {
    pub fn new(name: String) -> Self {
        Self { name }
    }

    fn getName(&self) -> &str {
        &self.name
    }
}

let foo = Foo::new("Duye".to_string());
```
